

COMMAND CENTER

The Better Way To Manage Your Telecom and Technology Services

Managing the vast and dynamic information about your telecom, Cloud and IT infrastructure services is a never-ending challenge. Spreadsheet solutions, aside from being highly manual, are inefficient, time consuming and fundamentally limited in what they can do.

That's why AAA is developing Command Center with a partner. Command Center is the next generation of our proprietary software platform specifically designed for management and visibility of, as well as archiving and reporting on, all of your technology data.

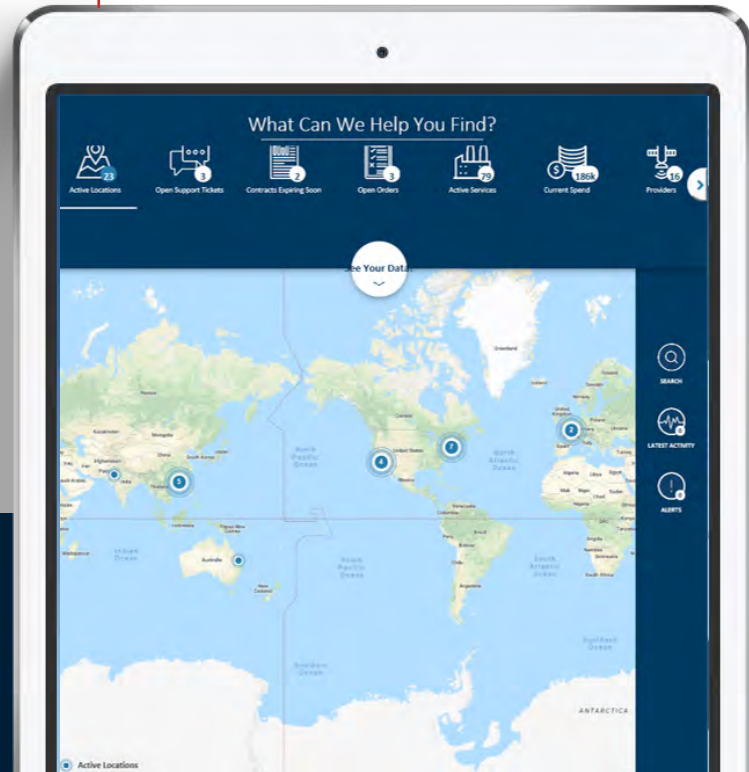

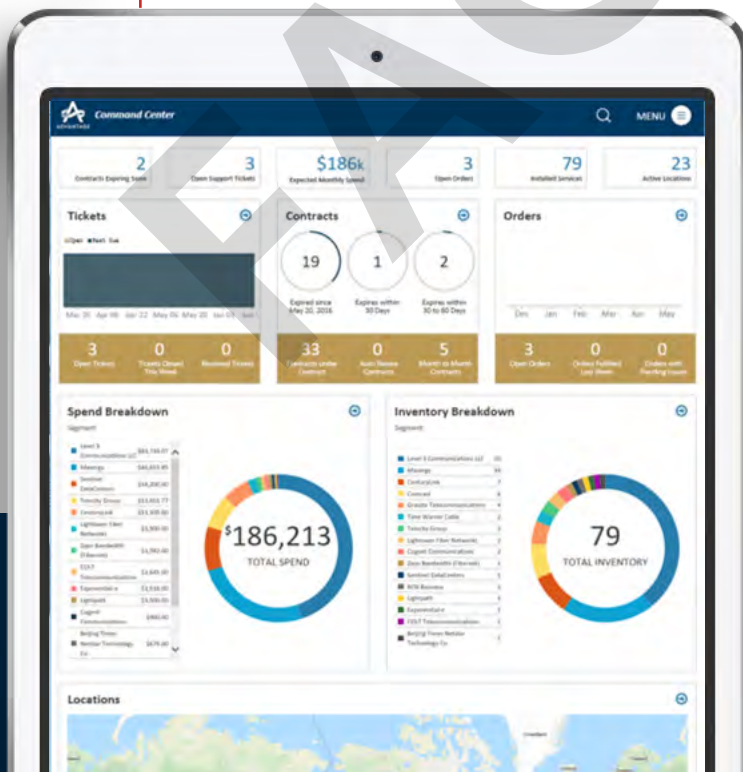

Command Center puts all data at your fingertips, regardless of provider or location. Flexible menu options (Dashboard and Map) let you customize your online experience, and all data is sortable and exportable. And, thanks to our SaaS delivery model, Command Center is easily, and securely, accessible via any devices from anywhere you have an Internet connection.

DASHBOARD VIEW

View Enterprise-wide summaries of all key reporting metrics, and drill down to detailed data.

MAP VIEW

See all data organized by geographic location, with enterprise-wide view capabilities

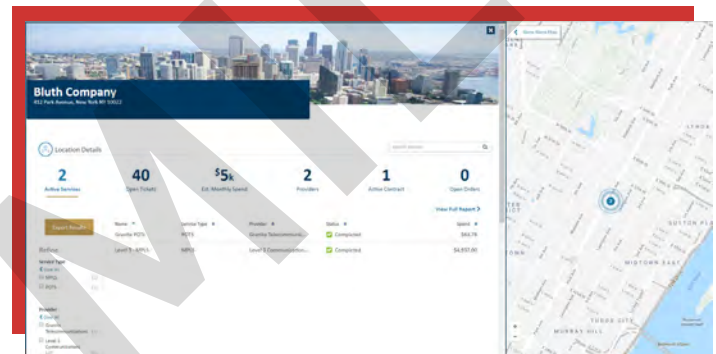

TRACK SERVICE INVENTORY & CONTRACTS

Access comprehensive listings of your services and related contracts across all service types, providers and geographies with filtering capabilities that enable efficient retrieval of any detailed data required.
